Problem Statement:

You are required to write a menu-driven Java program that implements four separate problems. The program should allow the user to select which problem to run, execute the corresponding logic, and then return to the menu until the user chooses to exit.

The four problems are as follows (Already done in assignment 2, just put it in switch case):

Problem 1: Grade Evaluation System

Problem 2: Leap Year Check

Problem 3: Day of the week

Problem 4: Identify Default Values of Variables

Case 5: Exit

```
C:\Users\PRANALI\Desktop\Assignment_Solution\Logi Building\Assignment_3>javac MenuDrivenProgram.java
```

```
C:\Users\PRANALI\Desktop\Assignment_Solution\Logi Building\Assignment_3>java MenuDrivenProgram
```
